C. SPECIAL CONDITIONS

1. This permit is for storm water runoff only. No discharge of boiler blowdown or air compressor condensate to surface drainage is allowed.
2. A construction permit shall be obtained for any treatment system to be employed to meet permit limitations.
3. This permit may be reopened and modified, or alternatively revoked and reissued, to:

 - (b) Incorporate new or modified effluent limitations or other conditions, if the result of a waste load allocation study, toxicity test or other information indicates changes are necessary to assure compliance with Missouri's Water Quality Standards.
 - (c) Incorporate new or modified effluent limitations or other conditions if, as the result of a watershed analysis, a Total Maximum Daily Load (TMDL) limitation is developed for the receiving waters which are currently included in Missouri's list of waters of the state not fully achieving the state's water quality standards, also called the 303(d) list.
